

Basic Email Setup Instructions – for Blackberry

Step 1: Create an Internet Email Service Account on your BlackBerry Device

You must create an initial BlackBerry Internet Service account to begin using email on your BlackBerry device. You can create your BlackBerry Internet Service account either “Over the Air” using your BlackBerry device or from your computer.

One initial BlackBerry Internet Service account per device may be set up.
Once you set up your initial account, you can add up to 10 additional supported ISP email accounts.

The account that you create gives you the default email address for your device.

1. Verify that your device has wireless coverage.
2. From the Home screen, click Internet Browser.
3. Click BlackBerry Email Setup.
4. On the Sign In screen, click Create Your Account.
5. Click Continue.
6. Review the Legal Terms and Conditions carefully and if acceptable, click I Agree.
7. Type your account information:

User ID: Create a personal user ID for your account.

This user ID will be your login name and the first part of the default email address for your device.

Friendly name: Create a name that you want to appear in the From field of the messages that you send.

If you do not type a name, the email address for your device will be used.

Password: Create a personal login password.

Passwords must contain between 4 and 16 characters,
are case-sensitive, and cannot contain accented characters.

Note: You must use the multi-tap method to enter a password.

Press a key once for the first letter and twice for the second letter.

Re-enter Password: Retype your personal login password.

8. Click Submit.
9. Click Done.

Step 2: Add your WDWEB - MorePhotos Email Account(s)

1. Click Add Account:
2. Enter your email account address (yourname@yourdomain.com).
3. Enter your User name (yourname@yourdomain.com).
4. Enter your Password. Enter the same password you use to access your email account directly.
5. Re-enter the Password.
6. Click Submit. Your email account has now been setup.
7. Depending on the account that you select, you might be prompted for the following information:
Email Server: (pop.yourdomainname.com)
Port Number: (21)
Leave messages on mail server: Clear this check box only if you do not want to save messages sent to your device on the message server.
Utilize SSL: (Leave this set to off.)
8. Click Submit.
9. Choose an email address that you would like to use in the From field when replying to messages received from your BlackBerry device email account.
You have completed the integration of your existing ISP or external email account(s).
